GreenWave

Linear decompaction for fine turf

The GreenWave is a compact, lightweight, tractor mounted linear decompactor for fine turf areas. Ideal for compact tractors of around 20-25hp. The GreenWave is designed for relieving compaction to a depth of 150mm, using 8mm thick, forged steel blades. The GreenWave uses the tried & tested “ShockWave” principal to shatter sub-surface compaction with little or no disruption to the playing surface and no additional clean-up. Suitable for greens & tees, bowling greens and other constructed fine-turf playing surfaces.

Specification

Working width	1.20cm
Overall / transport width	1.50cm
Working depth	150mm
Weight (approx)	360kg
Blade thickness	8mm
Blade spacing	150mm
Power requirement	20 - 25hp
Tractor requirements	540 pto.
Operating speed	0 - 4mph (0-7kph) Creep gear or hydrostatic drive req'd
