

TIP Greens Spiker / Seeder

The Greens Spiker / Seeder is an ideal tool for creating a seed-bed on a variety of fine-turf surfaces such as, golf greens, tees, bowling greens, cricket-squares, etc. The unit can be towed or 3 point linkage mounted to suit most common turf vehicles. The large-diameter tine drum creates thousands of tiny holes to hold seed, and greatly improves germination rates. The unit can also be used without seed to improve surface drainage, increase infiltration rates, promote gaseous exchange and reduce dry-patch.

Specification

Effective working width	120cm (48")
Overall / transport width	135cm (54")
Working depth	30mm (1¼")
Weight	277kg Mounted. / 340kg Towed.
No. of tines	1208
Tine thickness	7mm (5/8") tapered
Tine spacing	40mm (1½")
Tractor requirement - Mounted	Cat 1: 3pt linkage
Vehicle requirement - Towed	Tow hitch. Double-acting hyd. spool valve. 12v plug
