2500 FIELDTOPMAKER®

The FIELDTOPMAKER® 2500 is a heavy-duty fraise mower, for removing unwanted surface matter such as poa-annua, thatch, weeds or the entire surface to a depth of 50mm. A side arm conveyor removes debris directly into a trailer, leaving a level even surface. The FIELDTOPMAKER® 2500 is designed for maximum efficiency for sports turf applications like football & rugby pitches, turf farms, etc. An easily fitted scarifying rotor allows the FIELDTOPMAKER® 2500 to be used as a heavy-duty scarifier with optional mid-mounted roller for undulating ground.

Specification

Working width / Overall width	2.50m wide / 3.00m wide
Working depth	0 - 50mm deep
No. of digging blades	80 (40 x LH, 40 x RH)
No. of scarifying blades	148
Scarifying blade spacing	3mm blades (at 34mm spacing)
Number of Terraplane® blades	75
Number of Universe® blades	(10mm) 250 on every holder
Number of Universe® Finesse blades	(5mm) 250 on every holder * (3mm) 250 on every holder *
Weight	1,955kg (depending on rotor fitted)
Power requirement	95 - 120hp Creep gear, hydrostatic drive required
Tractor requirement	540 pto. 40ltr/min hydraulic flow. 2 x double acting spool
Operating speed	0 - 1.2mph (0-2kph) with digging rotor and Terraplane® rotor 0 - 2.4mph (0 - 4kph) for Universe® rotor 0 - 3.7mph (0-6kph) with scarifying rotor
Optional Accessories	Mid mounted roller (required on undulating ground)

* different configurations are available
