

VOTEX

Votex B20 / B40 / B60 Blowers

The Votex B20 / B40 / B60 blowers are designed according to the 'forced air guidance' principal and has a double sided air inlet. This enlarges the air intake without enlarging the turbine. Though the capacity is high, the weight of the rotating parts is extremely low. This low weight prevents overcharging of the power train of the tractor when thrown into gear. The blower can fit several PTO speeds and directions. Optional 180 degrees hydraulic swinging chute.

Specification	B20	B40	B60
Width	94cms	96cms	96cms
Height	81cms	1.20m	1.20m
Length	58cms	1.30m	1.30m
Weight (approx)	105kgs	278kgs	278kgs
PTO		540/1000 RPM	
Minimum PTO power	20hp	40hp	60hp
3-point linkage		Cat I & II rear or front mounted	
Construction frame		Steel	
Construction turbine		Sheet steel, double sided closed	
Intake	Single sided	Double sided	
Air control		Several air outlets available
