

VOTEX VT420

The VT420 is a compact vacuum sweeper with a high tipping container of 4.20mtr³. With a low total weight and a low centre of gravity, it is ideally combined with compact tractors from 45hp and more. The turbine offers lots of power, it is made of durable steel, and has a long life. The VT420 comes standard with a 1.70mtr vacuum funnel with a weight transfer system. It is because of this system that the funnel is best capable of following the terrain without damaging it. The VT420 can be equipped with several options like a manual suction pipe, a scarifier and a flail mower. With both the scarifier & the flail mower the material is collected in the same pass.

Specification

Working width	1.87mtr
Height / Length	2.30mtr / 4.75mtr
Weight (approx)	1,843kgs
Chassis - Hitch	Adjustable hitch
Chassis - Brakes	Un-braked, optional hyd. or overrun brakes
Chassis - Tyres	15.0 x 17 line profile RIB
Turbine Construction	16mm hardox
Turbine Construction Housing	Double isolated with 4mm wearing plates
Tractor requirement	45hp +
Funnel working width / overall width	1.70mtr / 1.87mtr
Brush shaft	Standard hyd. propelled
