

DAKOTA

310 SP

The Dakota 310 is a compact and very manoeuvrable dual spinner pedestrian topdresser. It can spread up to 6mtrs wide infinitely variable by individual hand controls on the handle bar. Robust construction of the Dakota 310 and its easy of use make it ideal for spreading sand, rubber crumb and other topdressings on sports surfaces where access for the other models of Dakota is restricted.

Specification

Spreading width	up to 6 mtrs (minimum spread width 2.40m)
Hopper size	0.91m(L) x 0.86m(W) x 0.45m(H)
Hopper load height	0.96m
Hopper capacity	0.29m ³ (level) - 0.34 ³ (heaped) (15cm heaped)
Weight (approx)	363kg unladen
Engine	Honda GX340
Tyre size	18 x 9.50 x 8
