

Air2G2

Inject pressurised air 12-inches beneath the surface to increase space and promote faster drainage and root development

Available Exclusively From Campey Turf Care Systems

Air is everything to
anything that lives!

AIR2G2

The multi-award winning AIR2G2

The Air2G2 324 is an easy to operate, self-propelled machine proudly made in the USA. The Air2G2 324 uses three probes to laterally inject pressurised air up to 12-inches beneath the surface of the soil to fracture the compacted layers that form as a result of foot traffic, mechanical traffic and nature's daily wear and tear.

These laterally injected air blasts loosen up compacted soil immediately, but without any disruption to the surface of the turf or the roots below. With frequent use, the Air2G2 324 creates surfaces that are healthy, firm and ready for play immediately after treatment. Air is everything to anything that lives, and for your soil, the Air2G2 324 is a breath of fresh air.

Perfecting Play™

Results that simply speak for themselves

The Air2G2 has achieved very impressive independent test results backed up with numerous awards and industry recognition for it's game changing innovation.

85%

More Air Pores

2200%

Improved Infiltration

21%

Reduced Surface Hardness

- Infiltration rates increased from 0.69"/hr to 15.77"/hr in just two months (after 2 operations). An increase of 2,200%
- Air porosity was increased from 11.8% to 21.3% in two months (2 operations). An increase of 46%

- Water porosity was reduced from 32.62% to 28.59% in 2 months (2 operations), to below the recommended rate of 30%
- Initial air to water balance in soil was 1: 2.76
- After one operation 36.7% more air spaces
- After two operations 85% more air spaces
- Final air to water balance in soil was 1: 1.31 - Almost textbook figures!

Caterpillar

Inject pressurised air 12-inches beneath the surface

- Aerate when the playing surface needs it and not when it fits into the calendar
- No disruption to play
- No loss of revenue
- 400,000 litres of air into a 10,000 mtr sq. sports pitch
- Only 4 holes per mtr square
- Two blasts of air in each injection
- Inject air upto 12" (depending on probes fitted)
- 20,000 litres of air into a 500 sq. mtr golf green

AIR2G2

CORING

AIR2G2

Aerate with the Air2G2 anytime of the year with no disruption to play

Loosen compacted soil immediately without any disruption to the surface of the turf or the roots below. With frequent use creates surfaces that are healthy, firm and ready for play immediately after treatment.

- Compaction Relief: Fractures hardpan layers without disruption to roots or playing surfaces
- Lateral air injections increase pore space, promote faster drainage and root development

Long term benefits of the Air2G2

Immediately relieves soil compaction with no downtime or turf disruption—lawns, sports fields and golf courses are ready to use right after treatment. Air2G2 is easy to operate, easy to train your crew to use with no post-application cleanup necessary.

Instantly break through compacted soil, bringing air to suffocating roots, allowing you to quickly improve water drainage and encourage deeper root growth
