

DAKOTA

Simple to use turf tenders designed to save time,
eliminate waste, and reduce operating costs

Available Exclusively From Campey Turf Care Systems

Spread light, heavy, wet or dry,
nothing is easier to use or adjust
than a Dakota Turf Tender

Perfecting Play™

DAKOTA

Well dressed

The Dakota Turf Tender range is specially designed for the fast transportation and application of top dressing. They will handle both wet and dry materials, allowing light to heavy dressing. Ideal for golf courses and sports fields.

DAKOTA

Designed to save
time, eliminate
waste and reduce
operating costs

All Dakota's spread wet or dry material, meaning minimal passes, less visible wheel marks and quick operation and all spinner package points are common with larger models, meaning only a small selection of parts to stock if you have two or more machines.

- Large hoppers make for easy loading, also speeding up work

- A variety of materials can be used including sand, rubber crumb and other topdressing materials

- The dual-spinner system allows for extremely fine to extremely heavy spreading
- Available in electric or manual options to suit budgets

Electric Control Box

DAKOTA

310 SP

The Dakota 310 is a compact and very manoeuvrable dual spinner pedestrian top-dresser. The 6-meter wide spread can be infinitely varied using the individual hand controls on the handlebar. Robust construction of the Dakota 310 and its easy use make it ideal for spreading sand, rubber crumb and other topdressings on sports surfaces where access for the other models of Dakota is restricted.

“ *The reason I decided to get the Dakota 310 was for use over the autumn and winter months. I wanted to spare the greens the extra weight, and the 310 was the best way to do that without compromising on the quality of spread.* ”

John Lockyer,

Director of Greenkeeping, The Wisley

DAKOTA

410 Mounted

The Dakota 410 is specially designed to be body mounted on the John Deere Pro-Gator and Toro Workman. It will handle both wet & dry materials, allowing light to heavy dressing and can easily be loaded with a 1.8m wide tractor bucket. It features accurate and easy to operate calibration, with no manual adjustment*. The 410 is easy to fit and allows for easy servicing due to its hydraulic lift function. It can be used to fill bunkers or drainage runs with optional accessories. Wide spread pattern via dual spinner discharge system.

(for John Deere, Toro and Jacobsen)

DAKOTA

410 Towed

The Dakota 410 is specially designed for the fast transportation & application of topdressing. It will handle both wet and dry materials, allowing light to heavy dressing. It features accurate and easy to operate calibration system. Ideal for use on golf courses and sports fields. The 410 features Ultra Trac turf tyres, A-Frame hitch with adjustable height and dual spinner discharge system. Can be used to fill bunkers or drainage runs with optional accessories. An optional 15cm hopper extension is available.

“ *I haven't seen any other machines that have the same sort of material handling capacity and versatility like the Dakota has.*

Neil Lowther,

Golf Course Manager, Chart Hills GC

DAKOTA

411 Towed

The Dakota 411 is specially designed for the fast transportation and application of topdressing. It will handle both wet and dry materials allowing light to heavy dressings, and can easily be loaded with a 1.8m wide tractor bucket. It features accurate and easy to operate calibration with no manual adjustment*. The 411 model features 4 x 14" Ultra Trac turf tyres, on independent floating beam axles for maximum weight distribution. Options include accessories for material handling and a 28cm deep hopper extension is also available.
