TURF CARE SYSTEMS

QUALITY GROUND CARE EQUIPMENT

Accurate and efficient range
of disc seeders

VREDO

Specialist overseeder for grass playing surfaces

The Vredo Overseeder places the grass seed in direct contact with the soil giving almost total seed germination and benefits from an infinitely adjustable and highly accurate seed dosage mechanism.

Perfecting Play™

Research has confirmed that the Vredo Overseeding System generates a germination rate of 96%

VREDO

Turf-Fix Series

Compact, multi-function machine for seeding, dressing and aerating turf. The Vredo Turf-Fix Series is a very compact, multi-function machine for professional landscapers, contractors and clubs, looking to carry out a number of renovation and maintenance tasks with just one machine. Mounted or towed, the Turf-Fix can be used to overseed, apply sand dressing, sand slitting and aerate, simply by fixing different attachments to a universal base unit. Compatible with tractors as small as 16hp.

VREDO

Compact Series

The Vredo Compact Series is an accurate and efficient range of disc seeders designed for overseeding golf greens and tees, sports pitches and other amenity grass. Seed is placed in a V-shaped slit at a pre-set depth of between 5mm and 25mm deep, directly in contact with the soil for maximum germination rate. The slits are then closed by a compaction roller and a level surface re-established. There are 4 different widths available to suit tractor overlap, all 3-point mounted behind compact tractors.

“ We specifically went for the Vredo because if you look at the specifications and write up it's had you can see it's undoubtedly the best on the market. Grass seed isn't cheap and you want all the seed where it's going to grow, you don't want it left on the top, and the machine puts everything where it should be.

Dave Harvey,

Contracts Manager, ALS Contracts Services

VREDO

Super Compact Series

Due to the unique action of the Vredo seed application, the grass seed is placed in direct contact with the soil, giving almost total seed germination. A double row of discs give 35mm seed spacing, meaning that one-pass operation will generally suffice with no disruption to play even on fine turf. 5 models of the Super Compact Series are available, each as a 3-point linkage mounted option or towed with its own hydraulic lift frame.

VREDO

Every Seed Counts!

Prevent expensive seed waste: Vredo makes every seed count! The ownership of a VREDO overseeder is an investment that will repay itself in a very short amount of time. By placing the seed into the ground instead of merely broadcasting it on top of it, you make the best use of your grass seed, which makes your grass lush and green in no time. Other "overseeder" are probably cheaper to buy, but are much more expensive in everyday use and in the long run.
