

SUZUKI

## KingQuads

KingQuads are built for the toughest conditions. Every Suzuki KingQuad is packed with technology, from the 500X to the 750XPZ. Each model offers the ideal balance of innovative technical specification, toughness and handling for riders on hill farms, lowland farms, estates and equestrian properties to name but a few areas of use. Suzuki has been building ATVs for over 30 years, they are technologically innovative and designed with end users in mind. They produce ATVs that work as hard as you do, day in and day out. Offering versatile traction, simple controls, and reliable maneuvering, they're designed to take the hard out of a hard day's work.

### Key Information At A Glance

The big, clear digital LCD display includes a speedometer, odometer, twin trip meters, clock, hour meter, gear indicator, fuel gauge, drive mode readings and new service reminder. Everything you need to know, at a glance.

### Simple Controls

On the rough ground and in foul weather, you've got enough on your mind without worrying about what gear you're in. Choose one of our models with continuously variable transmission to take care of this for you.

### Easy Manoeuvring

Optional power steering makes for much easier low-speed manoeuvring. It also helps eliminate bump-steer at higher speeds, giving you a more comfortable, safer, and better ride.

### Versatile Traction

The design our ATVs to be easy to use – and it doesn't get much simpler than this. When things get tough, just press the big red button on the handlebar to engage 4-wheel drive, and flick the button to lock the rear diff.

### Reliable Braking

Water and mud are your ATV's natural working environment. Our sealed rear brake unit prevents the brake parts from getting wet or, giving you consistent and predictable braking, whatever the conditions.

Campey supply market leading, innovative turf care machinery worldwide, we're continually researching new techniques and refining existing practices to help turf care professionals achieve perfection.

### All Day Comfort

Suzuki understand that when you spend hours on your ATV you need it to be comfortable. Our unique T-shaped seat, which they invented years ago and have fitted to our ATVs ever since, providing all-day comfort and freedom of movement you simply won't find anywhere else.

### Smooth And Quality Ride

Suzuki's first introduced fully independent suspension on ATVs way back in 1991. Since then, we've applied the technology on a number of our models, allowing you to go where you want with the greatest comfort.

### Grip In All Conditions

Heavy rain doesn't stop you. With our torque-sensing slip limiting front differential, it won't stop your ATV either. Designed specifically for UK conditions, the system detects wheel spin and automatically transfers power to whichever wheel has the most grip.

### Powerful And Economical

Running a business, you've always got one eye (if not both) on your costs. Our efficient fuel injection system, fitted to all KingQuad ATV models, ensures each drop is well used, as well as boosting performance and reliability.

### Specification

Model	500	750
Engine capacity	493 cc	722 cc
Engine	4-stroke, single cylinder, SOHC, 4-valve	4-stroke, single cylinder, DOHC, 4-valve
Bore	87.5 mm x 82 mm	104 mm x 85 mm
Compression ratio	9.9:1	9.9:1
Lubrication	Wet sump	Wet sump
Ignition	Electronic Ignition (CDI)	Electronic Ignition (CDI)
Fuel system	Fuel injection	Fuel injection
Starter	Electric	Electric
Transmission	CVT, 2-speed forward with reverse and front diff-locked 4WD	
Drive	Shaft	Shaft
