

VAN VUUREN

# BigTick® 1040

The BigTick®1040 is durable, heavy in weight, and has a solid design. It is the best and most economical solution for harvesting high-quality large turf rolls. With the speed of operation offered by the BigTick®1040, a high production capacity of 2400 meter per hour is achieved. A big turf roll has a maximum width of 40 inches (1m). It becomes possible to harvest two 20-inch (0.5m) turf rolls by installing the optional center coultter disk. This turf harvesting machine delivers consistent thickness and compact large turf rolls. Top-quality blades ensure top-quality turf rolls.

## Specification

Cutting width	16 inch (40cm), upon request 18 (45cm) or 24 inch (60cm)
Cutting width	40 inch (1m) of 48 inch (1,2m)
Cutting length	Up to 40m for single rolls
Capacity	Cutting speed approx. 40m/minute
Blade type	Van Vuuren coulter blade system
Optional	Automatic cutting to length

## Advantages of the BigTick®1040 when harvesting large turf rolls

- Top-quality and strong cutting blade
- Heavy frame and sturdy pressure roller
- Optional middle coultter disk to split the roll width in half
- Standard featuring electronic thickness control
- Manually adjustable thickness control for general adjustments

## Required tractor

- 2- or 4-wheel drive tractor with at least 40 HP
- Category II three-point linkage

Campey supply market leading, innovative turf care machinery worldwide, we're continually researching new techniques and refining existing practices to help turf care professionals achieve perfection.
