## ShockWave

100 / 160 / 210 / 220 / 275 /  
eXtreme 275 / 366

The Imants ShockWave is the perfect linear decompactor for heavily used areas where play can't stop. This machine is designed to revitalise fine turf and sports fields by relieving soil compaction, improving aeration and removing surface water, all whilst causing minimal surface disruption so play can resume quickly and safely. All ShockWave models feature a no-chains, direct drive design, maintenance free 'sealed for life' bearings and no shear bolts

Imants ShockWave 220/275 brings linear decompaction to wide areas, making it the perfect machine for contractors. Using thicker 15mm knives and featuring hydraulic depth adjustment from the tractor, this machine takes the ShockWave's attributes of relieving soil compaction, improving aeration and removing surface water and applies them to large turf areas that need to be revitalised and ready for action quickly.

Campey supply market leading, innovative turf care machinery worldwide, we're continually researching new techniques and refining existing practices to help turf care professionals achieve perfection.
