

BELLON MIT

BM60 Rake

The CAMPEY™ BM60 is a spring rake designed for the maintenance of large gardens, parks, football fields, golf courses and other types of green areas. Thanks to a high working speed and continuous vibration of the springs, this product allows to remove the thatch from the ground without clogging the springs themselves and to obtain surface scarification at the same time. The rear wheel kit allows the use of the BM60 also for the maintenance of synthetic turf surfaces if there is a need to loosen the infill compacted due to weather conditions, or intense use. As well as during the installation phase of the turf for the clogging of organic material or rubber.

Specification

Power	30 hp-kw
Working width	1700mm
Tine	3mm
Height/width/depth	1000 x 2000 x 800
Weight	150

Campey supply market leading, innovative turf care machinery worldwide, we're continually researching new techniques and refining existing practices to help turf care professionals achieve perfection.
