

## FOAMSTREAM

# L12

The L12 weed killer cleaner is modern, greener alternative to traditional forms of weed control

Foamstream offers an innovative, eco-friendly solution to the age-old problem of tackling weeds on paved areas. Combining hot water with a biodegradable foam made from plant oils and sugars, Foamstream effectively controls a wide range of weed species. The contained heat penetrates the waxy outer layer of the leaf, travels down the stem to the roots, and kills or severely damages the plant. Additionally, Foamstream sterilises surrounding seeds and spores, reducing future weed growth and the number of treatments required.

The L12 includes additional functionality for street cleaning and a new rinse-mode feature providing the operator with an option to use the machine with just water and no foam at high or low pressure.

Campey supply market leading, innovative turf care machinery worldwide, we're continually researching new techniques and refining existing practices to help turf care professionals achieve perfection.
