ANDERSONS SR2000 Rotary Spreader

The SR-2000 is a very efficient fertiliser spreader which has a setting rate. It also has a shut-off control switch, limiting the amount of wasted fertiliser / seed. It evenly dispenses the product over a large area; having a capacity of 42 litres (22 kg) and a spray pattern from 2 – 6 metres. This saves time as the spreader will not need to be refilled too often.

Additionally its durable, stainless steel frame rests upon large wheels that will not leave any tread marks during application.

- Reliable fertiliser spreader, good for years of service
- Sturdy stainless steel frame
- Equipped with a setting rate and shut off switch
- Can carry 42 litres, or 22 kg of seed / fertilizer
- Has a spray pattern of 2 – 6 metres
- Wheels do not leave behind any tracks

Campey supply market leading, innovative turf care machinery worldwide, we're continually researching new techniques and refining existing practices to help turf care professionals achieve perfection.
