

FI EQUIPMENT

Fairway Falcon™

The Fairway Falcon™ is an articulating, pull-type fairway brush designed for ease of use and effective results. It features a ground-driven rotary brushing method within a dual pivot linkage system, allowing it to contour to the surface and maintain consistent contact with the turf. By incorporating electrical systems, the Falcon increases compatibility with a wider range of tow vehicles, making it easy to integrate into existing maintenance routines and start improving turf health and playing conditions immediately. The Fairway Falcon™ delivers multifunctional performance by correcting grass blade orientation for optimal pre-cut preparation, dethatching, removing dew, redistributing worm castings to help reduce turf disease, crumbling aeration cores to spread organic matter, and brushing in topdressing in a single pass. Through these combined functions, the Fairway Falcon™ consistently enhances both the aesthetics and performance of fairways.

Specification

Working Width	15' 2" (4.63 m)
Ideal Working Speed	6 mph (10 km/h)
Max. Transport Speed	12 mph (20 km/h)
Weight	1080 lbs (490 kg)
Battery Hook Up	12 V
Towing Capacity	420 lbs (190 kg)
Suggested HP Requirement	20 HP
Operating Dimensions	121" (3.07 m) L X 190" (4.83 m) W X 12" (30.48 cm) H
Transport Dimensions	119" (3.02 m) L X 82" (2.08 m) W X 90" (2.29 m) H
Shipping Dimensions	62" (1.57 m) L X 82" (2.08 m) W X 90" (2.29 m) H

Campey supply market leading, innovative turf care machinery worldwide, we're continually researching new techniques and refining existing practices to help turf care professionals achieve perfection.
