

IMANTS

RECYCLINGDRESSER® 1.3

The new lightweight **RECYCLINGDRESSER® 1.3** is designed for use with smaller tractors. It's engineered to reduce labour and material costs by recycling and redistributing existing soil across the playing surface. Now featuring a new rear flap that drags in material more efficiently and breaks it up faster, it also speeds up drying time. This sustainable maintenance practice aerates the underlying soil both vertically and horizontally, removing soil from the root zone and redistributing it. This process eliminates layering and compaction, increases biological activity, and extends the effectiveness of existing fertilisers in the soil. The new smart folding legs double as protective side bars, ensuring transport and storage are simple and secure.

Specification

Working width	mm (")	1300 (51)
Working depth	mm (")	175 (6,9)
Distance between digging blades	mm (")	260 (10,2)
Weight (approx)	kg (lbs)	470 (1036)
Power requirements		30hp
Tractor requirements		540 PTO.
Operating speed	km/h (mph)	3 (1,9)
Machine width (parked)	mm (")	1575 (62)

Campey supply market leading, innovative turf care machinery worldwide, we're continually researching new techniques and refining existing practices to help turf care professionals achieve perfection.
