

TCT

FAIRWAY TRENCHER

The TCT Fairway Trencher is designed specifically for golf course drainage, ideal for creating and maintaining drainage systems on fairways, tees, and greens. It's also effective for irrigation and services installation. This PTO-driven chain trencher features a built-in soil clean-up system that elevates soil onto a conveyor and deposits it onto a trailer or truck, minimising clean-up time. The machine can easily be converted into a conventional trencher by removing the conveyor, and its 3-point linkage allows quick attachment and detachment for use with other implements.

The TCT Fairway Trencher offers adjustable digging widths and depths, making it highly versatile for a wide range of drainage projects. It handles everything from primary drainage with trench widths of 150-200mm to slit drainage with trenches as narrow as 75mm. The double belt conveyor system efficiently moves spoil, minimising clean-up and helping keep the worksite tidy.

The Fairway Trencher is made using high-quality components and manufacturing processes, ensuring our machines are exceptionally durable for all types of trenching applications. Designed for low maintenance, our machines feature universal parts, making it easy and hassle-free to replace worn components.

Campey supply market leading, innovative turf care machinery worldwide, we're continually researching new techniques and refining existing practices to help turf care professionals achieve perfection.

Why Choose Fairway Trencher?

Adjustable Side Rollers: Designed to prevent turf scuffing. Once the machine is on the ground, it tows like a trailer, with no weight placed on the tractor's 3-point hitch.

Direct Drive Reduction Gearbox: Provides high torque, delivering the power needed to break through hard pan soils.

Double Conveyor System: Ensures fast and efficient spoil removal with two separate working conveyor belts.

Main Drive: Maintenance-free, with bearings housed in an enclosed, oil-filled housing for added durability.

Quality: The Fairway Trencher is designed and manufactured with exceptional craftsmanship and reliability.

Specification

Power Source	PTO
Trenching Widths	75mm, 100mm, 150mm, 200mm
Trenching Depths	800mm or 1000mm
Cutting Teeth	Tungsten carbide for superior performance
Conveyor System	Double-belt system for efficient spoil removal
Crumber Bar	Grading system for smooth trench finish
Drive Shaft	PTO drive with slip clutch
Machine Weight	860kg
Dimensions (L x W x H)	2.0 x 1.2 x 1.17mtr
Attachment Type	3-Point Linkage
Maintenance	Low-maintenance with universal parts
Transmission Requirement	40–70 Hp with Hydrostatic or creep gear

Machine Options

Complete Laser Control: The machine can be equipped with laser depth control for precise laser grading and drainage slope management

Hydraulic Control: The Fairway machine can be equipped with a solenoid control valve, conveyor ram, and a control panel, allowing full control directly from the tractor.

Conventional Trenching: Conveyor can be easily removed to convert the trencher into a side dispensing conventional trencher.
